

# The **3-IN-1** All-Rounder

## THE NEW E1ZMLA10 PUMP ALTERNATOR AND TIMING RELAY: 3 FUNCTIONS IN 1 COMPACT DEVICE!

Automatic pump control for tanks or reheating industrial ovens – these are only a few of the many applications that the E1ZMLA10 from TELE ensures smooth and fail-safe operation in. It is used whenever several loads have to be optimized for the same task, or uneven wear along with failure has to be prevented, or even when short-term capacity peaks need to be compensated.

By combining the most popular timing relay functionalities with the TELE pump alternator function, the E1ZMLA10 replaces several separate products and thus reduces inventory, cuts costs in purchasing and saves effort and training for administration, engineering, and sales.

### PROFIT FROM OUR E1ZMLA10 24-240V AC/DC:

- ✓ Best price-performance ratio
- ✓ Pump- and load alternator and timing relay in one unit
- ✓ Made in Austria
- ✓ Wide range voltage of 24-240V AC/DC
- ✓ Tested & approved worldwide:  
cULus, CE and EAC
